Dr. Daniel Osmond,
Governor,
University of Toronto,
3334-5 King College Circle,
Toronto.

M5S 1A1

June 24, 1989

Dear Dr. Osmond,

I urge you to inquire into the work of U of T Psychiatry Professor Donna Stewart.

Recently another Ontario man with environmental sensitivities committed suicide after being turned down for social assistance benefits. The doctor who denied his benefits used three articles by Donna Stewart as reason.

Dr. Stewart's knowledge of environmental sensitivity is abysmal, her sampling technique for her so-called study is unscientific, her arguments illogical and riddled with hyperbole, suggestion, and innuendo. A more complete argument pointing out the unscientific, damaging, and therefore unethical work of this presumably well-intending professor is available from Dona Harvey in U of T's administration.

Dr. Stewart's articles have contributed to an undetermined number of misdiagnoses and deaths in Ontario.

Academic freedom requires responsibility for the consequences of one's actions. I support your institution's defense of academic freedom, but not at the expense of human life or legitimate scientific method.

Sincerely,

Chris Brown
